

Intern Assignment: Brand Information Portal

Objective: Create a web-based portal where users can easily access and search for details of various brands, companies, or organizations. The portal should have a beautiful UI, be easy to navigate, and provide fast search functionality.

Requirements:

1. Brand Information Entry:

- Users should be able to add details for a specific brand, company, or organization.
- Required details: Official email address, company website, social media handles.
- Users should be able to add tags to categorize the brand.

2. Search Functionality:

- Implement a fast and efficient search feature.
- Users should be able to search by brand name or tags.
- Search results should display relevant details in a clear and organized manner.

3. User-Friendly Interface:

- Design a beautiful and intuitive UI for the portal.
- Ensure easy navigation between pages and features.
- Consider responsive design for various devices.
- User should be able to download specific detail in image.

4. Tagging System:

- Implement a tagging system to categorize brands.
- Tags should enhance the search experience and aid in organizing information.

5. Data Validation and Error Handling:

- Validate user inputs to ensure data accuracy and no duplicate entry.

6. Documentation:

- Provide clear documentation for users on how to use the portal.
- Include a guide on adding, editing, and searching for brand information.

7. Testing:

- Conduct thorough testing to identify and fix any bugs or issues.
- Test the portal's performance, especially the search functionality.

8. Submission:

- Interns should submit the project source code and any necessary files.
- Include a brief report on the design choices made and challenges faced during development.

Evaluation Criteria: Interns will be evaluated based on the following criteria:

- UI design and user experience.
- Functionality and performance of the search feature.
- Security measures implemented.
- Quality of code and documentation.

Submission Deadline: 1 Week

push you code in your github repo and share with us.

Note: Interns are encouraged to be creative and innovative in their approach to designing the portal. The goal is to create a user-friendly and visually appealing platform for accessing brand information efficiently.

All The Best
