Internship Assignment

An assessment to measure basic knowledge of

- HTML
- CSS
- JavaScript
- GitHub

Pre-requisite

- Node js v >18
- VS Code
- Browser

How to Start

1. clone below repo in your local

   - *Canvas*
   - *Kidz*

2. go to **internship** branch on each repo.

3. follow *README.md* to setup and run both the project separately in local.

4. understand the code and project context.

5. create new branch from *internship* branch

What to do

these both repo have little game developed in HTML and CSS we want to add all game on same page

- merge both code in single repo preferably in *canvas* branch, but whichever you find it a better fit and all panel should be on same page.
- add common header and footer with back button on every page.
- add dark theme.

Criteria

- build and dev command should works fine.
- commit and push code regularly on repo and raise PR once done sufficiently.
- maintain high coding standard; use eslint/prettier.
- refactor the code, wherever required. use common utility methods, remove duplicate code.
- feel free to ask question in various forum (stack overflow, github) but do not reveal original code

feel free to contact via mail for any issue while setup and running or understanding the flow.

All The Best 🫰
