Internship Assignment: Indian Folk Dance Showcase

Objective

Create a web page showcasing the diverse folk dances of India, providing information about each state's dance form. The page should be well-organized, visually appealing, and user-friendly.

Task Overview

Homepage: Indian Folk Dance Overview

Design a clean and visually appealing homepage displaying a map of India. Each state on the map should be clickable, leading to the respective state's folk dance page.

State-wise Folk Dance Pages

For each state, create a dedicated page containing the following elements

- State Dance Name: Clearly display the name of the folk dance.
- Image: Include a high-quality image representing the dance form.
- Brief History: Provide a concise history of the dance form, highlighting its cultural significance.
- Trivia: any facts or famous artist name
- Wiki Page Link: Include a link to the dance form's Wikipedia page for users who want to explore further.

Navigation

Implement a user-friendly navigation system

Use a menu or clickable map on the homepage for easy access to state-wise pages.

Include a "Home" button on each state page for quick navigation back to the homepage.

Design and Layout

Ensure the design is neat, organized, and visually appealing. Use a consistent layout for all state pages to maintain a cohesive look. Optimize

images and use a responsive design for a seamless user experience on different devices.

Code Quality

Write clean and well-documented HTML, CSS, and JavaScript code. Ensure the website is compatible with major web browsers. Implement responsive design principles for a smooth experience on various devices.

Submission Guidelines

Submit a compressed folder containing all project files, including HTML, CSS, JavaScript, and images. Provide a README file with instructions on how to navigate and use the website. Include comments in the code to explain the functionality and structure.

Evaluation Criteria

Design and User Experience (40%): Neat, visually appealing, and easy-to-navigate pages. Content Quality (30%): Accurate and concise information about each folk dance. Code Quality (20%): Well-organized and documented code with good coding practices. Responsiveness (10%): Ensure the website functions well on different devices.

Note: Reach out for clarification or guidance if needed. The goal is to create an informative and enjoyable platform for users to explore the rich tapestry of Indian folk dances.
